

Chest CT Report

Lakeside Medical Imaging — CT & Radiology
Bordeaux Lake Avenue, Bristol BS6 5DR

Patient name:	Damien Roche
Postal address:	3 Pine Walk, Bristol BS9 1JG
Social security no.:	1 92 02 33 678 234 11
Imaging centre:	Lakeside Medical Imaging — North Site
Reporting radiologist:	Dr. Sophie Albertini
Modality:	CT scan
Anatomical area:	Thorax
Performed on:	30/03/2026

Indication

Persistent cough for 2 months with recent haemoptysis.

Technique

Helical thoracic acquisition before and after injection of 100 mL iodinated contrast. Multiplanar reconstructions performed.

Findings

Spiculated nodule in the right upper lobe measuring 22 mm in long axis, with irregular margins, highly suspicious. No significant mediastinal lymphadenopathy. Remaining lung parenchyma unremarkable.

Impression

Suspicious 22 mm pulmonary nodule of the right upper lobe. Further work-up (PET-CT and pulmonology referral) recommended without delay.
